

Why Your Customers Deserve Better Security

62%

Small businesses are hit by **62%** of all cyberattacks¹

1.24M

The average cost of a compromise for SMBs in 2019 was **\$1.24M¹**

58%

58% of SMBs say they do not have visibility into employees' password practices¹¹ Ponemon SMB Report 2019

Protect their business with the strongest security team on the planet.

What are the main security concerns?

Securing the network

Firewalls control access to your company's resources by monitoring incoming and outgoing network traffic. For added protection, look for a firewall that offers visibility and automation.

Protecting employees' devices

Cisco Advanced Malware Protection (AMP) prevents threats at the point of entry and then continuously tracks every file it allows onto your endpoints, such as mobile devices, laptops, desktop PCs, and more.

Talos: The Ultimate Security Advantage

Talos security intelligence is the industry's most powerful cyber threat protection, which Cisco integrates into every solution. Talos tracks threats across end points, networks, cloud environments, web, and email providing a comprehensive understanding of cyber threats and solid, actionable intelligence.

19.7B

threats blocked per day

600B

emails inspected per day

1.5M

malware samples per day

With Cisco's integrated approach to security, your customers get:

1

A simplified security experience.

Protect their entire business with a powerful, yet simple, security approach.

2

Security that works as fast as you do.

Our security solutions work as a team to detect threats earlier and faster.

3

Security that grows with your business.

Future proof your customers' security strategy and reduce risk with solutions they can rely on.

"If it (an attack) does happen, we can find it quickly, shut it down, and contain it."

- Mike Austin, CEO, Macon-Bibb County Housing Authority
