

Cisco Security Assessment Menu

Free Security Offers in 2020

No matter where you are on your security journey, there's a solution for you.

The best part is trying it for free and learning as you go.

Contact your Cisco Security Account Team to enable these free assessments.

Advanced Malware Protection (AMP) for Endpoints

Do you have visibility into the files and processes running on your endpoints? If a malicious file is downloaded and executed, are you able to track its history and actions? Take the next step past traditional AV with next-generation endpoint security.

[Learn More](#)

Stealthwatch - Security Visibility Assessment

Is your network compromised today? How do you know? Take a two-week Security Visibility assessment to identify risky network behavior such as traffic to high-risk countries, remote access breaches, and telnet usage.

[Learn More](#)

Email Security with AMP

Protect against phishing, business email compromise, and spam with Cisco Email Security. Provides an additional layer of protection for Office 365 users.

[Learn More](#)

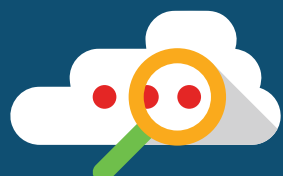

Duo Multi-Factor Authentication

Proactively reduce the risk of a data breach with Duo Multi-Factor Authentication. Verify users' identities, gain visibility into every device, and enforce adaptive policies to secure access to every application. Start a free, 30-day trial and start securing users in minutes.

Next Generation Firewall (NGFW) - Health Check

Are you using yesterday's firewalls to protect against today's attacks? Sign up for a Network Security Health Check hosted by our security preferred partners to ensure your network is healthy and safe from cyber-attacks.

[Get started](#)

Stealthwatch Cloud - Free Trial

Easily identify threats in your public cloud infrastructure and private network - from a single screen. Stealthwatch Cloud provides visibility and threat detection in Amazon Web Services, Google Cloud Platform and Microsoft Azure.

[Learn More](#)

Cloudlock - Security Assessment

Can your on-premise security protect cloud apps? Cisco Cloudlock quickly and easily helps protect your users, data and apps in the cloud against compromised accounts, data breaches and malware.

[Learn More](#)

Umbrella - Free Trial

Do you want to reduce malware and make limited staff more efficient? Cisco Umbrella deploys in less than 30 minutes to help you identify and investigate threats faster, and protect users from threats on the internet, everywhere they go.
